Database,MYSQL   Java   Angular   Git
data structures,OOP   Postgresql

HIGHLITED SOFTWARE APPLICATION

Tap-It (04/2021 - 05/2021)
- This is a mobile application that uses Google Ml kit to scan data captured by a camera(Camera-X). The use of the application is to help field agents who collect water meter readings, around homes, to maintain credibility while collecting the readings.

Wildlife tracker (02/2021 - 03/2021)
- This is a website application, that collects information about animals that are endangered or healthy. It uses Java and sparks as its framework. it uses postgres, a free and open-source relational database management system

GitApp
- A project I created using Angular, to display projects that a user has done and saved them on the GitHub Account. This application uses Angular as a framework of JavaScript.
