List three learning objectives, or the top three things you would like to learn/achieve/experience during your digital apprenticeship program. *

1. Strengthen my CV, by building transferrable skills that will attract future employers.
2. Build my network in my field.
3. Gaining more skills by learning from the program and the company.

What will be your most valuable contribution to your digital apprenticeship host company? *

What impact will the digital apprenticeship have on your career and professional path? *

My goal is to learn and gain new skills in my field. As an apprentice, I will find new interests in learning, by exploring more on the tasks that I will be working on, and this will lead to a high skillset on my CV.

Having a professional mentor who will train and guide me on managerial development and mentorship skills will be helpful in my career path.

The program will help me learn more about first-hand industry knowledge of how the industry works and this will be of great help in my career as a software engineer.

After participating in the digital apprenticeship, how will you leverage your digital apprenticeship experience to grow in your professional career? *

The program is here to help me as a junior tech professional. After participating in the program, here are some ways that I will leverage my experience and network.

I will maintain a good connection with my mentor.   I will keep engaging my mentor to guide me with ideas and to offer words of wisdom from a more professional, experienced setting.

I will also share my experience from the program with other junior professionals by teaching them more tech techniques and approaches to doing a clean project. I will also guide them on how they can choose their field of interest. I will be part of their job searching by preparing them with technical and general interviews.

List five things you would like to get out of your mentorship: e.g. general career advice & guidance, industry-specific expertise, management/leadership development, expanding my network etc. *

1. Network Growth.
2. Leadership development
3. personal development, like improved self-esteem, and self-confidence.
4. Career Advancement
5.

Have you received any professional mentorship before? *

Yes

Name of the mentorship program *

KamiLimu Mentorship program.

Passport Photo *

Nice professional portraits. DO NOT ATTACH A SELFIE!
